

Section 9: Table 4.2. Long-term review Top international meeting cities in 1859-2008

This table lists the number of meetings of type A for the years 1859 to 2008 for cities with a total of at least 100 meetings of type A over the course of these 150 years.

Meetings counted under the heading “A” are “Meetings of international organizations” and meet all the following criteria:

- meetings organized or sponsored by “international organizations”, i.e. international non-governmental organizations (INGOs) and intergovernmental organizations (IGOs) that are included in the UIA’s *Yearbook of International Organizations* (see the Introduction “What is an ‘international organization’”) and whose details are subject to systematic collection and updates on an annual basis by the UIA
- with at least 50 participants, or number of participants unknown

Note: In this table cities, while being listed under the country in which they are currently located, have been grouped and totalled by city, regardless of any changes in country name. Equally, cities with names known by various spellings have been grouped and totalled. For example, Prague is listed as “Prague, Czech Rep”, regardless of the year. Cities so treated are indicated by a “*” after the name.

Cities are listed in alphabetical order. Meetings are totalled in 25 year periods.

Caveat: When comparing consecutive years in flux, it should be remembered that both years’ totals can be expected to change over time, the latest slightly more rapidly than the older. For the years presented here, the data can be assumed to be now reasonably stable.

Data for the years prior to 1983 require special mention. The UIA meetings database – the source of this statistics report and of the *International Congress Calendar* – contains, with few exceptions, only information since 1983, the year in which the UIA installed its own computerized data storage system. Most data in this report for the years prior to 1983 were collected not by the rigorous collection methods under which the *International Congress Calendar* operates, but by the more flexible (insofar as recording meeting activity is concerned) standards of the *Yearbook of International Organizations*. The *Yearbook* presents a general picture of an organization and its activities (including its events) while the *Calendar* focuses exclusively on documenting events. It should therefore not be assumed that the data for the years prior to 1983, in most cases extracted from the *Yearbook* and not from the *Calendar*, give a complete history of the meetings of all organizations and associations. The volume of data available for analysis in this section is, however, sufficient to make it indicative.
