

**Table 9.1.2. Current year
Top international meeting countries in 2014**

This table is extracted from Table 1.1. Please see the Introduction or the introductory notes to Table 1.1. for an explanation of the column headings "A" and "A+B" and "A+C".

In this table, only the countries with **at least 20 meetings**, whether of type A or type A+B together or type A+C together, are included. Details of other countries can be found in Table 1.1. The total meetings of all countries, as listed in Table 1.1., is used to calculate the percentages.

Three lists are given:

- Countries are listed in descending order of the total number of meetings of type A., with at least 20 such meetings
- Countries are listed in descending order of the total number of meetings of type A+B , with at least 20 such meetings
- Countries are listed in descending order of the total number of meetings of type A+C, with at least 20 such meetings

Caveat: It should be remembered that the number of meetings in the database for the current reporting year will, on average, increase by about 11% over the next year, and by about 35% over the following five years.
