

Table 9.3.3. Fifteen year review: supplementary information
Number of participants in international meetings by month 2000-2014

This table lists the number of meetings of type A by month and by number of participants for each of the years from 2000 to 2014.

Meetings for which the number of participants is unknown, or for which the month is unknown, are not included here.

Meetings counted under the heading “A” are “Meetings of international organizations” and meet all the following criteria:

- meetings organized or sponsored by “international organizations”, i.e. international non-governmental organizations (INGOs) and intergovernmental organizations (IGOs) that are included in the UIA’s *Yearbook of International Organizations* (see the Introduction “What is an ‘international organization’”) and whose details are subject to systematic collection and updates on an annual basis by the UIA
- with at least 50 participants, or number of participants unknown

The number in the last column is the average percentage of the total meetings held in that month with that number of participants over 15 years. Thus: 1.4% of association meetings held in the past 15 years for which dates are known were held in February and had less than 101 participants.

Caveat: It should be remembered that the number of meetings in the database can be expected to increase over time: the more recent the year, the more rapid the increase. The average increase is about 11% over the first year, about 25% over the first three years, and about 35% over the first five years.
