

## Section 9.2: Table 9.2.1.(a) Current year Ratio of association membership to meetings in 2016

Note that the version of this table published in June 2017 contained errors. These errors have been corrected here.

This table uses the data on international association meetings of type A presented in Table 9.1.1. and also the data on international association membership documented in the database of the *Yearbook of International Organizations*.

Countries are listed in alphabetical order. For ranking, see Table 9.2.1.(b). Only countries with at least 1 international association meeting in 2016, as detailed in Table 9.1.1., are included here.

The first column gives the total number of meetings of type A held in 2016 in the country specified. The second column gives the total number of international associations with members in that country. The third column gives the ratio of meetings to association membership, where meetings has the value of "1".

**For example:** for 766.5 international associations with members in Albania there was 1 international association meeting in 2016 in Albania; for 72.0 international associations with members in Brazil there was 1 international association meeting in 2016 in Brazil.

The international associations included here are classified in the *Yearbook of International Organizations* under these types:

- A = federations of international organizations
- B = universal membership organizations
- C = intercontinental membership organizations
- D = limited or regionally defined membership organizations
- E = organizations emanating from places, persons or other bodies
- F = organizations having a special form, including foundations, funds
- G = internationally-oriented national organizations
- K = subsidiary and internal bodies
- N = national organizations
- R = religious orders, fraternities and secular institutes

**Meetings counted under the heading "A" are "Meetings of international organizations" and meet all the following criteria:**

- meetings organized or sponsored by "international organizations", i.e. international non-governmental organizations (INGOs) and intergovernmental organizations (IGOs) that are included in the UIA's *Yearbook of International Organizations* (see the Introduction "What is an 'international organization'") and whose details are subject to systematic collection and updates on an annual basis by the UIA
- with at least 50 participants, or number of participants unknown

**Caveat: It should be remembered that the number of meetings in the database for the current reporting year will, on average, increase by about 11% over the next year, and by about 32% over the following five years.**

## Section 9.2: Table 9.2.1.(b) Current year

### Top countries by ratio of association membership to meetings in 2016

Note that the version of this table published in June 2017 contained errors. These errors have been corrected here.

The introduction to Table 9.2.1.(a) applies equally to this table.

For an alphabetical listing see Table 9.2.1.(a). Only countries with fewer than 100 international associations with members in that country to 1 international association meeting in 2016, as detailed in Table 9.1.1., are included here.

**For example:** for 3.5 international associations with members in Singapore there was 1 international association meeting in 2016 in Singapore ; for 103.1 international associations with members in Sri Lanka there was 1 international association meeting in 2016 in Sri Lanka.

**Caveat:** It should be remembered that the number of meetings in the database for the current reporting year will, on average, increase by about 11% over the next year, and by about 32% over the following five years.
