

Section 9.2: Table 9.2.3.(a) Current year Ratio of population to meetings in 2016

This table uses the data on international association meetings of type A presented in Table 9.1.1. and also data on population numbers of the countries listed.

Countries are listed in alphabetical order. For ranking, see Table 9.2.3.(b). Only countries with at least 1 international association meeting in 2016, as detailed in Table 9.1.1., are included here.

The first column gives the total number of meetings of type A held in 2016 in the country specified. The second column gives the current population of that country. The third column gives the ratio of meetings to population, where meetings has the value of "1".

For example: for 1,443,013 people in Albania there was 1 international association meeting in 2016 in Albania; for 191,888 people in the Czech Republic there was 1 international association meeting in 2016 in the Czech Republic .

Meetings counted under the heading "A" are "Meetings of international organizations" and meet all the following criteria:

- meetings organized or sponsored by "international organizations", i.e. international non-governmental organizations (INGOs) and intergovernmental organizations (IGOs) that are included in the UIA's *Yearbook of International Organizations* (see the Introduction "What is an 'international organization'") and whose details are subject to systematic collection and updates on an annual basis by the UIA
- with at least 50 participants, or number of participants unknown

Caveat: It should be remembered that the number of meetings in the database for the current reporting year will, on average, increase by about 11% over the next year, and by about 32% over the following five years.

Section 9.2: Table 9.2.3.(b) Current year Top countries by ratio of population to meetings in 2016

The introduction to Table 9.2.3.(a) applies equally to this table.

For an alphabetical listing see Table 9.2.3.(a). Only countries with fewer than 2 million people to 1 international association meeting in 2016, as detailed in Table 9.1.1., are included here.

For example: for 3780 people in Monaco there was 1 international association meeting in 2016 in Monaco; for 239,891.3 people in Lithuania there was 1 international association meeting in 2016 in Lithuania.

Caveat: It should be remembered that the number of meetings in the database for the current reporting year will, on average, increase by about 11% over the next year, and by about 32% over the following five years.
